

CSR Infinity

As part of Concorde Group and Confindustria Ceramica, Infinity undertakes every day to comply with and observe Corporate Social Responsibility (CSR), i.e. to manage all its business activities as sustainably and ethically as possible.

Infinity is firmly convinced that the most successful forms of growth must not only take account of economic aspects, but also comply with the most important environmental, social, institutional and governance aspects.

All this is evident in the practical, effective attention Infinity pays to the following actions:

- Respect for nature and the surrounding environment, guaranteed through green, sustainable corporate choices.
- Investments in the Modena area, where the company is located.
- Close attention to the most recent rules and regulations governing safety in the workplace, protecting the physical and mental health of employees and offering a healthy, comfortable working environment.
- Development of the company's human resources, with training courses and workshops to strengthen skills and teamwork. Infinity firmly believes in the talents of its staff and in making the most of them.
